

AMENDMENTS TO THE SPECIFICATION:

Please amend the specification as follows:

Page 6, replace the paragraph beginning on line 37 through page 7, line 8 with the following amended paragraph:

Figures 6-10 all show an embodiment of a vehicle according to the present invention. ~~[[The]]~~ In Figure 6, the vehicle is a simplified form and comprising has a frame 1 with a driven rear wheel 3. ~~[[The]]~~ It includes an engine 30 and drive gear 32 ~~[[and]].~~ In Figures 7-10 a number of other necessary the elements have been removed to render the figures clearer. The vehicle also has two front wheels 2 which are both supported by two transversal bars ~~4e-4d~~ 4a-4d respectively. A-bars are shown in the figures. According to the invention, the frame 1 has at its forward part a perpendicularly arranged frame member 8. A transfer frame 7 is also provided above the frame 1, according to the invention. The transfer frame 7 has a perpendicular forward frame member 9, on which spring anchors 10a, 10b are provided for ~~springs~~ spring and damping means 5, 6 on each side of the vehicle. The spring and damping means 5, 6 are on their respective sides also connected at their other end to one or more of the transversal bars 4a-4d.
